UV-EMOI

Our EMOI (Extreme-Matt Oil Invisible) line is our system of exclusively open-pore oil-like finishes. EMOI preserves the natural allure of wood textures on flooring, while providing deep, whole-wood protection against scratches and micro-abrasions.

We believe that EMOI represents the dawn of a new generation for wood-finishing technologies, paving the way for maximum protection while maintaining the aesthetic appeal of natural wood.

Our Extreme-Matt Invisible series of products offers top-quality protection of wooden surfaces whilst maintaining the natural look and appeal of raw wood.

UV-EMOI

UV Extreme Matt
Oil Invisible

Application

- 3 layers UV-EMOI Base Coat
- 2 layers UV-EMOI Top Coat

This 5-layers application maximizes the coating's scratch-and abrasion-resistant properties.

As with all Viron products, we guarantee the environmental friendliness and sustainability of all coatings and finishes.

UV EMLI

EMLI (Extreme-Matt Lacquer Invisible) is our offering for both open and closed-pore lacquered finishes that improves the wood's resistance to scratches and micro-abrasions, while also giving surfaces a highly durable, low-gloss, virtually invisible finish that retains its gloss and does not fade.
