UV OIL

Especially popular in Japanese wood markets, UV oils give surfaces good protection while maintaining the high aesthetic appeals of wood.

Conventional oxidative oils run the risk of damaging the wood's natural fibres, or even changing its texture and colour over time.

Use Viron-UV, Viron's offering for high-matt (10%), full-wear, scratch- and chemical-resistant oil-based wood coatings designed to preserve your floors and panels and retain the natural beauty of wood surfaces.
